MARRAKECH, MOROCCO

Sustainability of Territories in the Context of Global Changes

1st AMSR CONGRESS and 23rd APDR CONGRESS

Special Session (SS09) on *Adapting to global change at the coast*

Organizers:

Nadia Mhammdi (Chair), Université Med V, Institut Scientifique, Rabat Agdal Maroc (nmhammdif@yahoo.com); *Abdellatif Khattabi*, Ecole Nationale Forestière d'Ingénieurs, Salé, Maroc (ab_khattabi@yahoo.com)

Aim and scope of the session:

Across the world coasts are dynamic and ever-changing. In recent years an improved understanding of natural processes has generated new concepts in the management of coastal landforms, water bodies and ecosystems. But we must not overlook social and economic changes, which are just as important in providing the context for sustainable management. Indeed 'global change' is as much about the globalisation of the economy and society as it is about global environmental change.
