The aim and scope of the special session:

The regional development and the agribusiness can be analyzed from different perspectives, because the territories are diverse in their characteristics and specificities, socioeconomic formation or when we analyze the links between regions and countries, with different regional production specialization. This special session brings a contribution to the debate of development strategies in different territorial contexts. Spatial planning is also included in this session, in order to present cases of success in a world of constant change, as well as the productive transformations that occur in a short time, with repercussions in the relocations of economic sectors, people, capital and investment.
