

*Special Session (SS02) on:
Transforming Agribusiness: Spatial Dynamics of People, Places,
and Sustainability*

Organizers:

Ana Marta-Costa (Chair)

Department of Economy, Sociology and Management, Centre for Transdisciplinary Development Studies (CETRAD), University of Trás-os-Montes e Alto Douro (UTAD); Portugal; Email: amarta@utad.pt

Maria Raquel Lucas

Department of Management, Mediterranean Institute for Agriculture, Environment and Development (MED) & Global Change and Sustainability Institute (CHANGE), University of Évora (UÉ); Portugal, Email: mrlucas@uevora.pt

The aim and scope:

This special session explores the intersection of sustainable transformation, spatial interactions, and agribusiness, focusing on how people and places shape and are shaped by sustainability-driven agricultural practices. We aim to discuss innovative strategies, policies, and technologies that foster sustainable land use, resource efficiency, and socio-economic resilience in agribusiness. Key topics include sustainable supply chains, smart farming, rural-urban linkages, and the role of digitalization in optimizing spatial interactions. By integrating perspectives from geography, economics, and environmental sciences, this session fosters interdisciplinary dialogue to drive impactful transformations in global and local agribusiness landscapes.
