

Special Session (SS20) on:

Green Transition, Digitalization, and AI for Sustainable Transformation: Data-Driven Solutions for Mobility, Migration, and Tourism in Urban and Rural Landscapes

Organizer:

Simona Cafieri, National Institute of Statistics, Italy. Email: caferi@istat.it

The aim and scope:

This session explores how the green transition, digitalization, and AI can drive sustainable transformation in urban and rural landscapes, shaping mobility, migration, and tourism. We will analyze how these factors foster equitable and resilient regional growth by optimizing resource use and promoting low-carbon economies. However, disparities in access to digital technologies and AI remain a challenge. The session will bring together experts to share experiences, case studies, and innovative solutions, stimulating discussions on effective policies to ensure an inclusive and sustainable transformation.
